

# HTML Practice Worksheet: Insurance Domain

## Section 1: Beginner (Foundations)

### - 1. Insurance Homepage Layout

Design the basic HTML structure for an insurance company's homepage with:

- A company logo or name in the header
- A navigation bar with links to Home, Policies, and Claims
- A footer with contact email and address

### - 2. Request a Car Insurance Quote

Create a form for users to request a car insurance quote with the following fields:

- Full Name
- Age
- Car Model
- Year of Manufacture
- Submit button

### - 3. Display Insurance Policy Types

List and describe 3 different types of insurance policies (e.g., Auto, Health, Life). Use headings and paragraphs appropriately.

## Section 2: Intermediate (Structure & Semantics)

### - 4. News Article About Insurance Regulation

Design a semantic HTML layout for a news article that includes:

- A title
- Author name
- Date published
- A couple of paragraphs about a new insurance law

### - 5. Customer Testimonials Section

Create a section to show 3 customer testimonials. Each testimonial should include:

- The customer's name
- A short quote
- Use a block-level element to separate each testimonial

## HTML Practice Worksheet: Insurance Domain

### - 6. Insurance Claims Process

List 5 steps in the claims process (e.g., Notify Company, Submit Documents). Use appropriate semantic tags for ordered steps.

### Section 3: Advanced (Interactive & Informational)

### - 7. Compare Health Insurance Plans

Design a layout to compare 3 health insurance plans using a table. Each column should show:

- Plan Name
- Monthly Premium
- Coverage Details
- Key Benefits

### - 8. Life Insurance FAQs (Expandable)

Create a Frequently Asked Questions (FAQ) section. Each question should be clickable to reveal the answer underneath (hint: use semantic HTML elements for toggling content).

### - 9. Insurance Agent Profile Card

Design a profile card for an insurance agent that includes:

- Agent's photo (placeholder is fine)
- Name and title
- Contact information
- Insurance specialties

### - 10. Claims Data Chart with Caption

Design a figure section that contains:

- An image or chart showing claims data for the past year
- A caption describing what the chart shows
- A paragraph explaining the trend

*Bonus Challenge: Wrap all your solutions inside a complete, valid HTML document structure (<!DOCTYPE html>...).*
